Hypnosis and Related States

Review by:
E. Stengel

There has been a revival of interest in hypnosis since World War II. It is gratifying that psychoanalysts have been in the forefront of those who have re-examined the psychodynamics of the hypnotic state and hypnotherapy. The book by Gill and Brennan, which has the subtitle 'Psychoanalytic Studies in Regression' is the most important comprehensive work in this field since the studies of Schilder and his associates. Hypnosis is viewed as 'a particular kind of regressive process which may be initiated either by sensory-motor-deprivation or by the stimulation of an archaic relationship to the hypnotist'. In emphasizing the importance of sensory deprivation, the authors have followed Kubie and Margolin. The hypnotic state implies a function.
