Pathology of the lung.

Author(s) : SPENCER, H.

Abstract : This work, designed as a reference work for pathologists, cover field of lung pathology with the exception of pulmonary tuberculosis. Chapt. 233) deals with the pulmonary mycotic diseases and includes mucor-mycos Rhizopus arrhizus, R. oryzae), aspergillosis (Aspergillus fumigatus, A. flavus, niger, A. versicolor), and infections by Coccidioides immitis, Blastomyces de. [Paracoccidioides] brasiliensis, Cryptococcus neoformans, Hisioplasma caps. Candida albicans, C. tropicalis, and Torulopsis glabrata.
In addition, Chapt. 7 includes sections on infections by *Actinomyces israelii* and *Nocardia asteroides* and *N. brasiliensis* (pp. 186-189), while Chapt. 11, on pneumoconioses and other occupational diseases, discusses the possible role of fungi in farmers' lung (pp. 351-355), bagassosis (pp. 355-356), byssinos (pp. 357-359), maple-bark stripper's lung (p. 358) [cf. 4, No. 1093].
