Westerners’ wonder and tendency for ‘the other’ in art goes back several centuries, although Orientalism appeared as a branch of science in the 19th century. The interest in the East was reinforced through trade, diplomacy, war and contact with artists in the 18th century. Orientalism became an important inspiration for the artists in the 19th century. The fantasy of ‘Eastern Culture’ in the 18th century was replaced by direct contact with the East. When travelling conditions in the 19th century improved, many artists began to visit Eastern lands. One such artist was Emelene Abbey Dunn, who was an American art educator and painter. There are not many publications about Emelene Dunn although she enthusiastically served as an artist and a teacher. Emelene Dunn, the primary topic of this study, had travelled to Eastern lands and went back to her native country with numerous sketches and travel notes. After the artist’s death, some notes of her Eastern journey, and some watercolour paintings, had been collected by her sister Mary Skinner Dunn in a book of memoirs which was published in Rochester under the name Mediterranean Picture Lands (1929).
