Witnessing the "Unwitnessed' in Steven Erikson's The Malazan Book of the Fallen.

Author(s): Melville, Peter

Abstract:
This essay argues that the role of witnessing is a central preoccupation and theme of Steven Erikson's The Malazan Fallen series. The essay focuses on acts of witness that necessarily differ from what philosophers call the "ordinary" or "legal" understanding of bearing witness, which involves the relation between a witness and the audience to whom he testifies, as in a court of law or in the documentary procedures of historical or journalistic record. The essay contends that Erikson's interest in acts of witness is neither legal nor historical so much as it is ethical. What matters most in the Malazan world is not bearing witness so much as being witness to an event. For it is in the non-juridical, ethical relation of the latter to the witnessed an imminent sense of recognition and respect, which in Erikson's novels oftentimes offers a promise of transcendence or divine ascension.
