Case management in long-term care: Options and opportunities.

Case Management in Long-Term Care: Options and Opportunities

Carol D. Austin

Published: 01 January 1983

Abstract

Case management—emphasizing coordination of services to individual clients—has become a familiar component in the service delivery for
community-based long-term care. The resource dependence theory of interorganizational relationships suggests guidelines for an expanded role that highlights case managers' allocation of resources and potential for intervention in local delivery systems.

Topic:

- case management
- delivery of health care
- long-term care
- guidelines
- coordination
- community
