Project evaluation: an integrated financial and economic analysis.

Author(s): Sell, A.

Abstract: Project evaluation or appraisal is often required by funding agencies and development institutions before they invest in developing countries. This book gives a detailed account of evaluation procedures, adopted by development agencies, particularly by UNIDO. After a brief introduction, part 1 outlines the different phases of a project evaluation, such as feasibility studies, implementation and ex-post evaluation. The procurement
also discussed, in section 2. Part 2 provides a detailed analysis of financial factors that could possibly affect investments, including liquidity planning. Finally, part 3 provides a review of the economic factors that affect project evaluation. Cost benefit analysis is pursued for a hypothetical case study.
