Mabberley's plant-book: a portable dictionary of plants, their classifications and uses.

Author(s): Mabberley, D. J.
Editors: Mabberley, D. J.

Abstract: Mabberley's *Plant-book* is internationally accepted as an essential reference text for anyone studying, growing or writing about plants. With over 24,000 entries, this comprehensive dictionary provides information on every family and genus of seed-bearing plants.
plant (including gymnosperms, plus ferns and clubmosses. The book contains taxonomic details and uses with English and other vernacular names. In this edition, each entry has been updated to take into consideration the most recent literature, notably the great advances in molecular analyses, and over 1650 additional new entries (including ecologically and economically important genera of mosses) have been added, ensuring that Mabberley's *Plant-book* continues to rank among the most practical and authoritative botanical texts available.
