'Pataphysics: A Useless Guide

Hugill, Andrew

Subject: Pataphysics, 'Pataphysics, Jarry, Modernism, Science

Abstract:

Of all the French cultural exports over the last 150 years or so, 'pataphysics--the science of imaginary solutions and the laws governing exceptions--has proven to be one of the most durable. Originating in the wild imagination of French poet and playwright Alfred Jarry and his schoolmates, resisting clear definition, purposefully useless, and almost impossible to understand, 'pataphysics nevertheless lies around the roots of Absurdism, Dada, futurism, surrealism, situationism, and other key cultural developments of the twentieth century. Andrew Hugill offers an informed exposition of a rich and the twin dangers of oversimplifying a serious subject and years' research, Hugill maps the 'pataphysical presence (partly conscious and acknowledged but largely unconscious and unacknowledged) in literature, theater, music, the visual influence in the social sciences and the sciences. He offers sources, intercalated with a thorough explication of key themes, he provides these in reverse chronological order, beginning backward to Jarry and beyond. He looks specifically at J. G. Ballard, Asger Jorn, Gilles Deleuze, Roger Shattuck, Jacques Prévert, Antonin Artaud, René Clair, the Marx Brothers, Joan Miró, Max Ernst, Marcel Duchamp, James Joyce, Flann O'Brien, and many others.
