- **Abstract**
  - The purposes of this study are to review the historical development of food and culture in the Korean Decimal Classification (KDC) and to propose improvements of the KDC to classify materials of food and culture effectively. This study examined changes of classification numbers and headings related to food and culture from the 1st edition to the 5th edition of the KDC. Recent books about food and culture were examined and were classified according to the latest edition of the KDC. Several problems were found including a lack of headings, including notes in food and culture, and a lack of headings about Korean foods in particular.
reflections about various foods from other countries, a lack of detailed re
Other classification systems about food and culture were analyzed and it classifying Korean traditional foods and table services, new formats for a headings.
