Abstract
Textile manufacturing is a major industrial production. It is based in the conversion of three types of fiber into yarn, then fabric, then textiles. A Technical textile is a textile product manufactured for non-aesthetic purposes, where function is the primary criterion. In this part Home textile is common & important part in technical textile. The new promise of technical textiles is generation of products that eventually have a direct impact upon all sorts of consumer textile markets, including both clothing and furnishings. These are called “Home-tech”. The home-tech segment of technical textiles comprises of the textile components used in house hold applications. Home Textile Product such as (i.e.: Towel,
