Strategic risk management: the new competitive edge

Christopher J Clarke ... Suvir Varma

Abstract

Risk Management has become a critical issue as a result of globalization and the continued quest for greater returns. Whilst most companies now see risk as a key strategic issue, risk is typically still treated tactically and piecemeal. In this article, the authors argue that an integrated risk management approach allows companies to consistently deliver superior performance while proactively managing risks. The article outlines a structured methodology for risk management process evaluation and change. The methodology has been developed through the authors’ work as risk management consultants to various companies globally.
Christopher J. Clarke, Visiting Professor at Henley Management College, was formerly Managing Director of A. T. Kearney’s management consultancy in Southeast Asia. Previously he was a managing director in investment banking. He is a former chairman of the Strategic Planning Society and has degrees in Economics and Management. Corresponding address: VP and MD Southeast Asia, A. T. Kearney Pte Ltd, 1 Temasek Avenue, 35-01 Millenia Tower, Singapore; e-mail: gina.goh@atkearney.com

Suvir Varma is a manager with A. T. Kearney in their Singapore office. He has advised various clients on risk management. Previously, he was in commercial and investment banking.
