The Gateway to History. --
Allan Nevins
Appleton-Century (1938)

Abstract
In this book, originally published in 1962, one of America’s most distinguished historians defines the scope and variety of his field and outlines his views on history’s objectives both as a science and as an art. The book provides insight into historians’ methods of interpreting and presenting the past from Thucydides to twentieth century scholarship on Europe and America. It sets apart the different approaches to history – biographical, cultural, intellectual, geographical and political – illuminating the peculiar goals, problems and development of each discipline. It discusses the question of pre-history and its companion science, archaeology and spans the history of the collection and use of records.
