Understanding pictures.

Title: Understanding pictures

Author: LOPES, Dominic

Publication year: 1996

Language: English

Abstract: The book is based on the author’s doctoral thesis originally presented under the title Pictures as perceptual symbols (Oxford, 1992). Develops a scheme for categorizing the different ways pictures represent meaning, with value in its representational diversity. Also offers an account of the phenomenology of pictorial experience, comparing pictures to visual prostheses like mirrors and binoculars. Concludes with a discussion of works of art which have made pictorial meaning their theme, demonstrating the importance of the issues raised for understanding the aesthetics of pictures.
