

Baxter–Sagart Old Chinese reconstruction, version of 20 February 2011

William H. Baxter (白一平) and Laurent Sagart (沙加爾)

order: alphabetical by Middle Chinese initial, final, and tone

The following table presents data for some 4,000 items with Old Chinese reconstructions in the Baxter-Sagart system, as of the current date, in alphabetical order by Middle Chinese initial, final, and tone. There are accompanying tables in the following orders: (1) Mandarin pronunciation in pīnyīn, (2) Middle Chinese final, initial, and tone; (3) *Grammata serica recensa* numbers, and (4) radical and stroke numbers. A full introduction and explanation of the Baxter-Sagart system is currently in preparation.

The columns are as follows:

字	character (traditional form)
pīnyīn	standard pronunciation in pīnyīn romanization
MC	ASCII-friendly Middle Chinese transcription
MC analyzed	Middle Chinese analyzed into initial, final, and tone (A, B, C, D)
OC	Old Chinese reconstruction in the Baxter-Sagart system, in two forms: (1) a convenient, user-friendly form that omits information about uncertainties in the reconstruction, followed (where necessary) by (2) a reconstruction in curly brackets which indicates more explicitly which parts of the reconstruction are less secure. For some items there are remarks about possible dialect developments.
gloss	a simple gloss intended for identification only; for more accurate information about meaning, one of the large standard dictionaries should be consulted.
GSR	the letter and number of the item in Karlgren's <i>Grammata serica recensa</i> ; items which do not appear in GSR are usually assigned an appropriate number, without a letter.
Unicode	hexadecimal Unicode for the character in the UTF-16 encoding

All data are in UTF-16 encoding (little-endian). The Times New Roman font is used except for the 字 column, which uses SimSun (Founder Extended), and the OC column, which uses Doulos SIL (available from www.sil.org).

Our data are certain to contain some errors, which we will attempt to correct in subsequent versions. We will be setting up a website soon to

receive comments, questions, and suggestions for corrections.
